WORK EXPERIENCE

Meta Reality Lab, Meta Platform Inc., US (Expected Jul 2024 ~ Expected Jan 2025)

Research Scientist Intern

- Will join Meta as a Research Scientist Intern working on 3D CV & Eye Tracking.

Noah’s Ark Lab, Huawei Technologies (UK), UK (Jul 2021 ~ Sept 2022)

Part-time Research Intern

- Proposed a method that learns pose, shape, and garment attributes of a dressed human from images using disentanglement, and using such attributes to control 3D models.
- Results were published in BMVC 2022.

Active Vision Lab, University of Oxford, UK (Jul 2018 ~ Oct 2018)

Research Assistant

- Supervised by Professor Victor Prisacariu and as a partner with a UK satellite company and developed an algorithm that can track the pose of the satellite in an image.
- The developed algorithm significantly outperformed alternatives and was used as a part of the redundant tracking system on the satellite.
